Acme Robotics 24 October 2026

Application: Platform Engineer (m/f/d)

Dear Acme Robotics Team,

I'm applying for the Platform Engineer role. Your stack of Kubernetes, Helm, Terraform and GitHub Actions is what I use every day.

At Northwind I manage Helm releases for 8 internal services and built GitHub Actions pipelines with SonarQube checks, which cut failed deployments by 25%.

At Contoso I moved EC2 services to Amazon EKS with Terraform.

My German is at B1 level, so I am more confident working in English.

I hold an EU Blue Card, so I don't need sponsorship. My notice period is three months. I'm happy to talk whenever suits you.

Kind regards,
Alex Example
